-

Other Projects

Microsoft Clone React.js , Tailwind CSS

Tesla Clone landingpage React.js

Portfolio React.js , Tailwind CSS

LinkedIn Clone HTML , CSS , JS

Dashboard HTML , CSS , JS

Other Skills

Leadership :- Lead a team of four as a frontend developer to build a full-stack software for approximate queries over XML data was a dynamic experience that sharpened both my technical and **interpersonal** skills. My role involved designing the user interface and facilitating constant **communication** among teammates, enhancing my ability to **listen** attentively and understand diverse perspectives. **Collaborating** closely, we navigated challenges with **adaptability** and embraced feedback, fostering a culture of continuous improvement. Through this project, I not only refined my frontend development expertise but also deepened my appreciation for effective **teamwork** and communication in software development contexts.
